SUMMARY

Computer Science Engineering student specializing in Data Science with hands-on experience in machine learning, data analytics, and software development. Published a Springer conference research paper and developed analytics and web applications using Python, SQL, and JavaScript. Seeking to apply analytical and AIdriven problem-solving skills in AI/ML and Data Science roles.

EDUCATION

Presidency University **Bangalore, India**
- Bachelor of Technology in CSE (Specialized in Data Science): CGPA-9.17 Sept. 23 – June. 27

St. Claret PU College **Bangalore, India**
- PCMC: Percentage – 93% June 2021 – Mar. 2023

RESEARCH AND PROJECTS

Research Paper – Re-examining Feature Importance: An Empirical Study of Model Generalization.
- Springer Conference Research Publication (2026).
- Research paper accepted by the conference, presented at the Springer conference, with publication in Springer conference proceedings pending.

Bengaluru House Price Estimator | Python, LightGBM, SHAP, JavaScript
- Cleaned 13,320 raw listings; LightGBM model reaches R^2 0.85, 19% lower error than a locality baseline.
- Explains every estimate factor by factor in the browser (matches SHAP values at 0.99 correlation).
- Live demo | GitHub: deeku46/bengaluru-house-prices

Scam SMS Detector | Python, Scikit-learn, NLP, FastAPI
- TF-IDF + logistic regression on 5,169 real SMS: 96.2% precision, 95.4% recall, ROC-AUC 0.996.
- Live app highlights the words behind each verdict; FastAPI endpoint ready for chatbot integration.
- Live demo | GitHub: deeku46/scam-sms-detector

Sales Analytics & Forecasting Dashboard | JavaScript, Pandas, Statsmodels
- Turns any sales CSV into KPIs, profit and discount analysis and auto-written insights in the browser.
- Back-tests 4 forecasting models and picks the best: Holt-Winters 12.5% MAPE vs 18.5% baseline.
- Live demo | GitHub: deeku46/sales-dashboard

Data Analytics on IndiGo Airlines | Python, Pandas, Matplotlib, Tkinter
- Analysed real-world airline datasets to explore routes, demand, and delays.
- Applied data cleaning and visualization techniques to uncover key insights.
- Highlighted business patterns and visualization techniques to uncover key insights.
- GitHub: deeku46/IndiGo-Analytics

EXPERIENCE

Samsung Innovation Campus Jun. 25 – July. 25
- Completed structured Data Science program focused on Python programming and key libraries such as Pandas, NumPy, and Matplotlib.
- Gained hands-on exposure to data preprocessing, visualization, and applying analytical methods to datasets.
- Program structured as summer training, continuing in upcoming phases for advanced topics in data science.

SKILLS & CERTIFICATIONS

- **Technical and tools:** Python, Git, SQL, JavaScript, Jupyter Notebook, Excel, VS code
- **Data Science and Machine Learning** : Pandas, NumPy, Matplotlib, Statistics, Seaborn, Scikit-learn
- **Certifications:**
  - NPTEL – Foundations of Deep Learning **(Elite + Silver)**
  - Springer Conference – Research Paper Presentation & Publication
  - Samsung Innovation Campus – SIC Internship Certificate
  - Scaler - Data Science: Mastering the Fundamentals, Python: Mastering the Essentials
  - Hackerrank - JavaScript.
